

Given that the AM and FM stations available in and around Chicago are full of shock-jocks and trash talk, I have found refuge in XM Radio; a service for which I pay. They give me what I want to listen to and they do it commercial free. There are few, if any, venues available in AM or FM that provide me the quality of service provided by XM Radio. Now I have the added benefit of Instant weather and traffic available ion XM radio. The NAB wishes to take that away from me and others who subscribe to XM. I would respectfully urge the FCC to reject the NAB petition 04-160.
